

The Latte of Freedom

The Latte of Freedom Foundation
P.O. Box 1458
Hagatna, Guam 96932

July 29, 2011

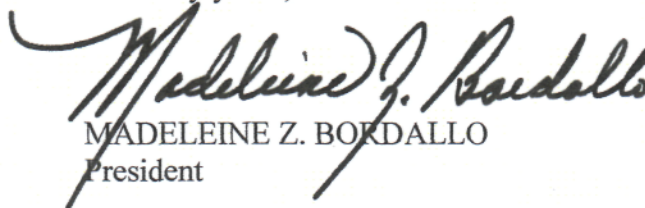

To Whomsoever's Presence These Letters Shall Come:

BASCON Corporation, duly chartered and license under the laws of Guam, is the locally owned general building contractor, selected and contracted by the Latte of Freedom Foundation to build the Latte of Freedom and to upgrade and improve the Hall of Governors at the Ricardo J. Bordallo Governor's Office Complex, Adelup, Guam, into a functional and fitting tribute to the Governor's of Guam. After a thorough review of its proposal, BASCON was selected, as the most responsive and responsible bidder. BASCON received the full recommendation of Taniguichi, Ruth, Makio and Associates, the architectural firm retained to design the project, as well as, manage the actual work.

During the progress of this project, the Latte of Freedom Foundation found that BASCON Corporation was prompt and attentive to requests and questions forthcoming from the Board of Directors of the Latte of Freedom Foundation. We found the project supervisors readily accessible and willing to meet with the Board to discuss and answer questions related to the work on the structure. Likewise, we found the management of BASCON readily accessible and prepared to attend meeting of the board and to respond to questions from its members, as well as, provide information and suggestions when requested. The Foundation finds the workmanship on the project, including the millwork and finishing touches, to be of excellent quality and finish.

The Latte of Freedom Foundation is providing this letter of reference and recommendation for BASCON Corporation as a reflection of its confidence in the quality of BASCON's work, the work ethics of its management and employees and our overall satisfaction with the company's performance.

Sincerely yours,

MADELEINE Z. BORDALLO
President
